I'm a self-taught professional with +14 years of strong experience in Software Development with focus on architecture and server-side systems. I have enjoyed working with a wide selection of technologies. I have been building and leading engineering teams the last 8 years.

Feb 2015 - Dec 2017. uBiome (Chile, Argentina & US)

VP of Engineering

I was in charge of building the Software Engineering Department in South America (Chile and Argentina). I Lead many of the engineering initiatives such as Micro-services Architecture Design, HIPAA compliance, Security practices, and many projects that were gradually delegated to the teams as they grew.

After I helped uBiome grow from 6 to +160 people company, having recruited +50 engineers, I proudly left uBiome taking with me a long list of achievements and lessons learned.

I remain as a company advisor, keeping intact the great relationships I built there.

Technologies involved: GNU/Linux, Flask (Python), Meteor (JavaScript), MySQL, MongoDB, PostgreSQL, Spark, Docker, GIT.

April 2012 - Feb 2015. Groupon LatAm (Chile)

Technical Manager

I was the first Technical Manager based in Chile, leading globalized teams and taking the technical ownership of some of the cutting edge of Groupon technologies.

Among others, I lead the Geo team which built a high performance Geospatial Indexing System based on Akka.

Technologies involved: GNU/Linux, MySQL, Play! (Java & Scala), Akka (Scala), Javascript, Storm, GIT.

July 2011 - April 2012. Tribal DDB (Chile)

Technical Leader

I was in charge of architecture design and implementation of several short-time projects, mostly designed for advertising.

Technologies involved: GNU/Linux, PHP, MySQL, HTML, Javascript, CSS, Python, Tornado, MongoDB, GIT.

January 2011 - July 2011. Condiminds (Chile & Argentina)

CTO

I Implemented many niche Social Network sites, based on Elgg (.org), engaged and contributed with Elgg Open Source Community. Organized two ElggCamp events.

Technologies involved: GNU/Linux, PHP, MySQL, HTML, Javascript, CSS, SVN, ELGG.

May 2010 – January 2011. Arcaris (Chile)

CTO

I joined Arcaris on it earliest phase. I Designed and built a Click-to-Call service, and a gamification platform oriented to Contact Centers (telemarketing).

Technologies involved: GNU/Linux, PHP, MySQL, Python, Tornado, FreeSwich, MongoDB, GIT, Javascript.

January 2008 - May 2010. Globant (Argentina)

Senior Developer

I worked on several projects, including some Open Source technologies such as Google Checkout Plugins and PHP Shindig (Open Social).

Technologies involved: GNU/Linux, PHP, Python, MySQL, HTML, CSS, Javascript, AJAX, SVN.

April 2006 – January 2008. NetLabs (Argentina)

Semi Senior Developer

I developed a large number of modules and features which completed an ISP oriented solutions suite.

Technologies involved: GNU/Linux, FreeBSD, PHP, MySQL, HTML, Javascript, Delphi, Visual Basic 6.

January 2004 - December 2005. LkR (Argentina)

Young entrepreneur

My first personal venture, which was the first ISP in my hometown. I also worked as a Freelance Software Developer.

Technologies involved: Windows, GNU/Linux, Delphi, Visual Basic 6.

October 2002 – December 2002. Ministerio de Educación de la Provincia de Buenos Aires (Argentina)

* Buenos Aires Province Ministry of Education

Course instructor

I applied and won an open contest to develop and dictate a six months Computer Operator course, intended for low resources people who never had a chance of using a computer.

Education

- Universidad Nacional de La Plata (UNLP, La Plata, Argentina)
Degree in Computer Science, abandoned for economic reasons.
